EDITOR-IN-CHIEF — D. P. PURPURA

ISSN 0 006–8993

Trends in NeuroSciences

the key to better communication between clinicians and researchers involved in neuroscience.

Advisory editorial board
C. Blakemore, Cambridge, U.K. **F. Bloom,** San Diego, CA., U.S.A. **W.M. Cowan,** St. Louis, MO., U.S.A. **O.D. Creutzfeldt,** Göttingen, Germany. **T.J. Crow,** Harrow, U.K. **T. Hökfelt,** Stockholm, Sweden. **M. Ito,** Tokyo, Japan. **L.L. Iversen,** Cambridge, U.K. **H.L. Klawans,** Chicago, ILL., U.S.A. **R. Porter,** Clayton, Vic., Australia. **D.P. Purpura,** New York, NY., U.S.A. **J.E. Treherne,** Cambridge, U.K. **J.N. Walton,** Newcastle upon Tyne, U.K. **D. de Wied** Utrecht, The Netherlands.

Staff editor
M.B. ter Haar, Cambridge, U.K.

Contents
Leader articles issues affecting the clinical and scientific community in general, but of particular importance to neuroscientists will provide the subject matter for the TINS leader.

Reviews
Invited review articles will discuss the latest theories and discoveries in the neurosciences with the general aim of 'educating across the disciplines'.

Inside a neuroscience institute
A regular look inside an institute or department, discussing current work, past successes and failures, and future plans.

Neuroscience news
This section will include news of appointments and discoveries, as well as a diary of recent and forthcoming events, from the large international congress to the weekend workshop.

Trends in NeuroSciences will also carry book reviews, letters to the editor, cartoons, crosswords, and reports on the position of neuroscientists in different countries.

Editorial aim it is the intention that Trends in NeuroSciences will not simply reflect current developments in isolated areas, but will stimulate discussion and comment between specialists in the hope of creating an intelligible dialogue across the entire spectrum of neuroscience and neurology. Authors will be encouraged to write in a style which is comprehensible to those working in other disciplines and to discuss ideas which are relevant to them and which may be controversial.

Personal edition
Special introductory offer of 6 issues - US $14.00/Dfl.34.00 *including postage.*
12 issues - US $29.50/Dfl.68.00 *including postage.*

Library edition
This will contain the archival material from the *personal edition,* reprinted and rebound to facilitate storage and retrieval. Subscribers to the *library edition* will also receive a monthly reading room copy of the *personal edition.*
Special introductory offer of 6 + 2 issues - US $31.75/Dfl.73.00 *including postage.*
12 + 4 issues - US $62.25/Dfl.145.00 *including postage*
(N.B. the special offer applies to the first six issues only).
Please send your orders or requests for free specimen copies to: **Trends in NeuroSciences,**
Elsevier/North-Holland Inc., 52 Vanderbilt Ave., New York, NY 10017
or outside North America - P.O. Box 548, Amsterdam The Netherlands.

NEW

ne first comprehensive methodology journal in this field

CALL FOR PAPERS

JOURNAL OF NEUROSCIENCE METHODS

ditor-in-chief
S. KELLY
RC Neurochemical Pharmacology Unit, Department of Pharmacology, Medical School, Hills Road,
ambridge CB2 2QD, U.K.

ssociate editors
.E. DIONNE, Burlington, VT., U.S.A. **E.G. MERRILL,** London, U.K. **F. VANDESANDE,** Ghent, Belgium.

ms and scope
ne **Journal of Neuroscience Methods** will publish research papers and a limited number of broad nd critical reviews dealing with new methods or significant developments of recognised methods, sed to investigate the organisation and fine structure, biochemistry, histo- and cyto-chemistry, hysiology, biophysics, and pharmacology of: receptors, neurones, synapses and glial cells in the ervous system of man, vertebrates and invertebrates. These studies may also be applicable to the inical and behavioural sciences; tissue culture; neurocommunications; biocybernetics or computer oftware.
lthough articles should be written in sufficient detail to allow others to verify these methods, ney should also be intelligible to a broad scientific audience. In addition, the journal will publish tters sent in camera-ready format, on paper supplied by the editorial office, containing comments r discussion of methodology described in this journal or any other journal devoted to the neuro- ciences.
